Cashmatic VisualPay 22 is the most economical, yet uncompromisingly high-performance solution among those designed by Cashmatic. Designed to process electronic and digital orders and payments only, it offers a fast, secure and cashless payment method.

Choosing the Cashmatic VisualPay 22 means investing in advanced technology that improves efficiency, increases security and offers an unparalleled payment experience. It is perfect for any business looking to adopt a modern and reliable payment method.

Functional features

Advanced technology

The VisualPay 22 uses the latest technological innovations to ensure efficient and reliable operation. Equipped with 12th generation Intel® processors and a 21.5 inch screen with PCAP multi-touch technology, it ensures smooth and responsive interaction.

Basic product, high performance

VisualPay 22 is a basic product with excellent performance thanks to its compact size and powerful PC, making it a self-contained, automatic and efficient cash point that is ideal for any commercial premises.

Electronic payments

It supports a wide range of electronic payment methods, including credit cards, debit cards, e-wallets and other digital solutions to guarantee fast transactions that are protected from fraud and unauthorised access and provide peace of mind to merchants and customers alike.

Top return on investment

Customers tend to spend 20% more when using this technology to place orders themselves than they do when served by staff. This can cut costs on staff or allow them to be reassigned to further improve customer service. The quick setup and efficient installation of VisualPay 22 means it is up and running quickly to optimise your ROI without interrupting operations.
